

*Compatibility Report for:*

*Adaptec RAID 6405 / 6445 / 6805*

*Adaptec RAID 6405T / 6805T*

*Adaptec RAID 6805Q and 6805TQ with maxCache 2.0*

This Compatibility Report reflects testing performed by Adaptec by PMC to test the interoperability of the products listed. It does not attempt to validate the quality of or preference for any of the listed products. It is also not an inclusive list and reflects a representative sample of products in each of the categories listed. All testing was done by the Adaptec by PMC Product Verification Group and the InterOperability Test Lab.

Minimum testing for listed drive enclosures consists of recognition on each RAID controller model and 24 hours of data integrity I/O stress load on each RAID Level under a variety of RAID states (optimal, suboptimal, degraded, compressed, expanded, and migrating). For enclosures that have a FW Revision associated with them, indicating an intelligent backplane, Activity and Fault LEDs on the enclosure are also tested.

Minimum testing for listed hard disk drives (HDDs) and solid state drives (SSDs) includes direct-attached recognition on each RAID controller model subjected to data integrity I/O stress load under each RAID Level with a variety of RAID states (optimal, suboptimal, degraded, compressed, expanding, and migrating). When selecting a hard drive or SSD, be aware that other factors not taken into account during this testing may impact successful operation. Just a few examples of such are, the use of an enclosure/backplane, not following the drive vendor's usage guidelines, or not providing adequate environmental support. Our compatibility reports are intended to be used as a guideline for compatibility, but it's important to factor in all requirements for your particular configuration prior to selecting a hard drive to fit your needs.

Minimum testing for listed host systems and motherboards consists of single and multiple controller recognition, controller BIOS interaction with host, and operating system bootability from each controller from every compatible PCIExpress slot. Systems that are capable of supporting more than 4 GB and more than 8 GB of memory are also tested in operating system environments that support such a configuration. Please note that some systems or motherboards may be listed multiple times if different system BIOS or CPU configurations were used.

Note:

If you encounter problems with a certain system or device, check the manufacturer for the latest BIOS or microcode.

Go to the Adaptec web site frequently for the latest updated list at <http://www.adaptec.com/compatibility>

# Hard Disk Drives (HDDs)

## COMPATIBILITY REPORT

Compatibility Report for:  
 Adaptec RAID 6405 / 6445 / 6805  
 Adaptec RAID 6405T / 6805T  
 Adaptec RAID 6805Q and 6805TQ with maxCache 2.0

\* Adaptec by PMC is committed to providing customers with a stable product that offers both, high performance and high reliability. Enterprise class hard drives and SSDs should always be used on an enterprise class system. Desktop or consumer class drives should not be used due to faster wear-out, I/O timeout incompatibilities, lower tolerances for vibration, and a lack of end-to-end data error detection and correction. Hard drive and SSD manufacturers develop drives to meet specific customer requirements for reliability, capacity, and performance. Using drives outside of their intended application can negatively impact server productivity and data reliability. Please contact the drive manufacturer regarding usage guidelines.

Hard Disk Drives (HDDs)		Note: Drives of the same family with different capacity should be compatible as long as the drive has the same (or more recent) firmware.							Intelligent Power Management

Intelligent Power Management (IPM) is an Adaptec-exclusive controller feature that can reduce hard drive power consumption by up to 70%. Testing has been performed to validate drive support of Power-Off Mode – drive completely spun down for maximum power savings.

'✓' indicates Adaptec testing resulted in reduced power in that particular power mode.

'N/A' indicates that the drive does not properly support Power-Off Mode.

'Not tested' indicates that Power-Off mode hasn't been tested.

# Solid State Drives (SSDs)

## COMPATIBILITY REPORT

Compatibility Report for:

Adaptec RAID 6405 / 6445 / 6805

Adaptec RAID 6405T / 6805T

Adaptec RAID 6805Q and 6805TQ with maxCache 2.0

\*maxCache SSD support:

up to 8 SSDs with a total capacity of 1 TB

\* Adaptec by PMC is committed to providing customers with a stable product that offers both, high performance and high reliability. Enterprise class hard drives and SSDs should always be used on an enterprise class system. Desktop or consumer class drives should not be used due to faster wear-out, I/O timeout incompatibilities, lower tolerances for vibration, and a lack of end-to-end data error detection and correction.

Hard drive and SSD manufacturers develop drives to meet specific customer requirements for reliability, capacity, and performance. Using drives outside of their intended application can negatively impact server productivity and data reliability. Please contact the drive manufacturer regarding usage guidelines.

### Solid State Drives (SSDs)

Note: Drives of the same family with different capacity should be compatible as long as the drive has the same (or more recent) firmware.

# Host Systems / Motherboards

## COMPATIBILITY REPORT

Compatibility Report for:  
 Adaptec RAID 6405 / 6445 / 6805  
 Adaptec RAID 6405T / 6805T  
 Adaptec RAID 6805Q and 6805TQ with maxCache 2.0

**Note: some systems or motherboards may be listed multiple times if different system BIOS or CPU configurations were used.**

Host Systems							
Manufacturer	Model	BIOS	Chipset	CPU	PCI Express Revision	Memory	Memory Type
Asus	KCMA-D8	2001	AMD SR5670	AMD Opteron 4184 2.8GHz 6 Cores	2.0	4 GB	DDR3
